

AIRBORNE DUST CONTROL by

DUSTSET 2020 is a non-polymer, super concentrate (1:4000 mixing ratio) with anti-foaming technology, increases water spray dust control effectiveness by up to 50%

DUSTSET 2020, can be setup as a fixed irrigation systems allowing for hundreds of meters of roadways to be sprayed without the use of a water truck. The irrigation system can utilize pit water supply & a dosing pump or a pre-diluted pumping system. The pumping system can be setup to start and stop based on a pneumatic timer or set to shutoff after a fixed volume is pumped from a reservoir using a pneumatic float switch.

Note: 1000-L of DUSTSET can last up to 4,000,000-L of water

DUSTSET 2020 will saturate roads up to a depth of 50-mm or more and will retain a moist substrata.

DUSTSET 2020 does not require the road to be preconditioned by scarping, ploughing & improves the compaction rate of haul roads.

DUSTSET 2020 Concentrate is:

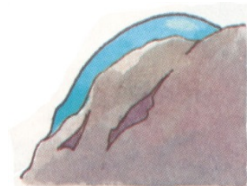

- ✓ Non hazardous
- ✓ Non flammable
- ✓ Biodegradable
- ✓ pH Neutral
- ✓ Environment and user friendly
- ✓ Low hazard to animals and plants
